

LEXTANT IS LOOKING FOR HUMAN-CENTERED DESIGN PROFESSIONALS

LEXTANT

Lextant is a Design Research and User Experience Design firm working with the world's leading companies to bring meaningful products and services to market. At Lextant, we believe that great design is about creating great experiences, and the best innovations are those inspired by the people who use them.

Lextant works in automotive, consumer packaged goods, retail, financial services, medical products and services and various other industries trying to create good and meaningful experiences for people.

Our services include:

- Experience Modeling
- Participatory Design and User Observation
- All forms of Usability Evaluation
- UX Design and Refinement
- Human Factors Consultation

Lextant is looking for interns and associates, who have a passion for understanding the human experience. You will conduct studies to identify user needs, evaluate and refine design concepts and prototypes and provide informed recommendations based on human factors design principles.

We're looking for full-time candidates with:

- An under-graduate or graduate degree in Psychology, Human Factors or Human-Computer Interaction
- 0-2 years of experience
- Knowledge of usability research methods and qualitative data analysis
- Excellent communication and presentation skills
- Strong design sensitivity
- Basic statistical analysis skills

Be prepared to discuss your research perspective and share your philosophy of User Experience Design.

If you are interested in interviewing with members of our Lextant team, please send your resume to jobs@lextant.com. We look forward to meeting you.
