

## LEXTANT IS LOOKING FOR UX INTERNS

### LEXTANT

Lextant is a Design Research and User Experience Design firm working with the world's leading companies to bring meaningful products and services to market. At Lextant, we believe that great design is about creating great experiences, and the best innovations are those inspired by the people who use them.

Lextant works in automotive, consumer packaged goods, retail, financial services, medical products and services and various other industries trying to create good and meaningful experiences for people.

Our services include:

- Experience Modeling
- Participatory Design and User Observation
- All forms of Usability Evaluation
- UX Design and Refinement
- Human Factors Consultation

Lextant is looking for Usability Practitioners, Human Factors Researchers and User Experience Designers to work with our teams to research, design and evaluate a variety of complex systems; including vehicle controls and displays, web-based interfaces and medical devices. You'll be part of our unique team seeking to inform and solve design challenges in entirely new ways.

Interns will most definitely experience:

- A collaborative, multi-disciplinary and innovative working environment
- An opportunity to continuously learn about new methods of research, analysis and translation
- A chance to work with some of the most influential brands in the world
- The opportunity to have a good time, learn and enhance your network

If you are interested in interviewing with members of our Lextant team, please send your resume to [jobs@lextant.com](mailto:jobs@lextant.com). We look forward to meeting you.
